PRINCIPALI CAMPI DI IMPIEGO

I DYES FOR WOOD sono soluzioni concentrate di coloranti selezionati per la loro particolare versatilità nella preparazione di TINTE PER LEGNO al solvente, all'acqua e per sistemi misti acqua/solvente.

CARATTERISTICHE

Le principali caratteristiche dei concentrati della linea DYES FOR WOOD sono:

- AMPIO SPETTRO DI COMPATIBILITÀ CON I SOLVENTI SIA POLARI CHE NON POLARI
- BASSA VISCOSITÀ
- FACILITÀ D'IMPIEGO
- ELEVATA BRILLANTEZZA
- TONALITÀ MOLTO INTENSE

Grazie alla particolare penetrazione nel legno dei coloranti, è possibile ottenere un'ottima uniformità di colore unita ad un elevato grado di trasparenza e brillantezza. La linea è composta da un'ampia gamma colori per soddisfare tutte le esigenze sia applicative che cromatiche.

MAIN USES

DYES FOR WOOD are concentrated solutions of dyes selected for their particular versatility in the preparation of dyes with solvent, water and mixed systems water/solvent.

FEATURES

The main characteristics of the DYES FOR WOOD line's concentrates are:

- WIDE RANGE OF COMPATIBILITY WITH POLAR AND NON POLAR SOLVENT
- LOW VISCOSITY
- EASE OF USE
- HIGH GLOSS
- HUE VERY INTENSE

Thanks to the particular penetration into the wood of the dyes, it is possible to obtain an excellent uniformity of color combined with a high degree of transparency and gloss. The line consists of a wide range of colors to meet the needs of both application that color.

PRINCIPALES UTILISATIONS

DYES FOR WOOD sont des solutions concentrées de colorants choisis pour leur polyvalence notamment dans la préparation de colorants pour le bois au solvant, à l'eau et pour les systèmes eau/solvant.

CARACTERISTIQUES

Les principales caractéristiques de la ligne DYES FOR WOOD sont:

- LARGE GAMME DE COMPATIBILITÉ AVEC POLAR ET NON POLAR SOLVANT
- FAIBLE VISCOSITÉ
- FACILITE D'UTILISATION
- HIGH GLOSS
- HUE TRES INTENSE

Grâce à la pénétration dans le bois des colorants on peut obtenir une excellente homogénéité de la couleur associée à un haut degré de transparence et de brillance. La ligne se compose d'une large gamme de couleurs pour répondre aux besoins à la fois de l'application et de la couleur.

PROPRIETÀ COLORANTI ED APPLICAZIONI

I DYES FOR WOOD sono soluzioni altamente concentrate adatte alla preparazione di tinte per legno sia all'acqua che a solvente.

Possono essere utilizzati in tutti i principali sistemi di tinteggiatura di manufatti per interni.

Grazie all'elevata brillantezza e trasparenza si ottengono ottimi effetti di tinteggiatura su legni "nobili" quali noce, ciliegio, faggio, noce tanganica, radica, etc. Con l'ausilio di opportuni leganti, anche sulle essenze meno compatte, come per esempio pioppo, toulipier, abete e pino, i risultati sono eccellenti.

Questi prodotti oltre ad essere miscibili tra loro in tutte le proporzioni, grazie alla elevata compatibilità con i solventi possono essere integrati anche in tinte ad elevato contenuto di pasta pigmentata.

Per ogni esigenza vi invitiamo a consultare il nostro servizio di assistenza tecnica info@softercolor.it

DYES PROPERTY AND APPLICATIONS

DYES FOR WOOD is highly concentrated solutions suitable for the preparation of dyes for wood both in water and in solvent.

They can be used in all major systems of the veneer of products for interiors.

The high gloss and transparency allow to achieve very good effects of painting on "noble" wood such as walnut, cherry, beech, walnut Tanganyika, root, etc.

With the aid of suitable ligands, the results are excellent also on essences less compact, such as poplar, toulipier, fir and pine.

DYES FOR WOOD line's products are miscible with each other in all proportions, thanks to the high compatibility with the solvents they can also be integrated in tints with high content of pigment paste.

PROPRIÉTÉ DE COLORANTS ET APPLICATIONS

DYES FOR WOOD sont de solutions très concentré convenant à la préparation de colorants pour le bois soit à l'eau soit au solvant. Ils peuvent être utilisés dans tous les systèmes de peinture pour l'intérieur.

En raison de la brillance et la transparence on peut obtenir de très bons effets de peinture sur bois "noble" comme le noyer, merisier, hêtre, noyer Tanganyika, racine, etc. Avec l'aide de ligands appropriés, également sur les essences moins compactes, comme le peuplier, toulipier, de sapins et de pins, les résultats sont excellents.

Ces produits sont miscibles entre eux en toutes proportions, grâce à la grande compatibilité avec les solvants et ils peuvent également être intégrés dans des peintures à haute teneur en pâte de pigment.
